# What is forex trading?

Forex trading, also known as foreign exchange or FX trading, is the conversion of one currency into another. FX is one of the most actively traded markets in the world, with individuals, companies and banks carrying out around \$6.6 trillion worth of forex transactions every single day.

While a lot of foreign exchange is done for practical purposes, the vast majority of currency conversion is undertaken by forex traders to earn a profit. The amount of currency converted every day can make price movements of some currencies extremely volatile – which is something to be aware of before you start forex trading.

We're one of the world leading retail forex providers<sup>7</sup> – with a range of major, minor and exotic currency pairs for you to go long or short on.

# Forex explained

## A quick snapshot of Forex

Forex trading is the act of speculating on the movement of exchange prices by buying one currency while simultaneously selling another.

## There's no larger market

With an average turnover in excess of \$7.5 trillion a day\*, currency prices are constantly fluctuating – creating endless trading opportunities in the world's most traded market.

## Forex never sleeps

As a globally traded market, the foreign exchange market is open 24 hours a day, five days a week (Sunday 5PM to Friday 5PM).

# What is Cryptocurrency?

Cryptocurrency, sometimes called crypto-currency or crypto, is any form of currency that exists digitally or virtually and uses cryptography to secure transactions. Cryptocurrencies don't have a central issuing or regulating authority, instead uses a decentralized system to record transactions and issue new units.

Cryptocurrency is a digital payment system that doesn't rely on banks to verify transactions. It's a peer-to-peer system that can enable anyone anywhere to send and receive payments. Instead of being physical money carried around and exchanged in the real world, cryptocurrency payments exist purely as digital entries in an online database describing specific transactions. When you transfer cryptocurrency funds, the transactions are recorded in a public ledger and The Cryptocurrency are stored in digital wallets.

The first cryptocurrency was [Bitcoin](#), which was founded in 2009 and remains the best known today. Much of the interest in cryptocurrencies is to trade for profit, with speculators at times driving prices skyward.

# What is Cryptocurrency Trading?

Cryptocurrency trading involves buying and selling digital assets to make a profit. Unlike traditional currencies, cryptocurrencies are decentralized, meaning that they are not controlled by any government or financial institution. Instead, they are based on blockchain technology, which records all transactions and ensures that they are secure and transparent.

To start trading cryptocurrencies, you need to choose a reputable crypto exchange like [BINANCE trading platform](#). Once you have an account, you can deposit funds and start trading. You can choose to buy and hold a cryptocurrency for a long-term investment, or you can actively trade it by buying and selling frequently.

There are many different types of cryptocurrencies available for trading, including Bitcoin, Ethereum, Litecoin, and more. Each cryptocurrency has its own unique features and benefits, so it's important to do your research before investment.
